

Worksheet 1

Digitalisation around us

Objective:

Develop curiosity about political and social developments, including in the digital sphere.

Participants:

Youth workers

Ideas for activities:

Your task is to identify factors and tensions pushing for more digitalisation and key changes in a person's living context.

The following set of trends and tensions are developed by [SITRA](#) - an organisation researching future trends and actually accountable to the Finnish parliament. They collaborate with partners from different sectors to research, trial and implement bold new ideas that shape the future.

Therefore, some of the aspects mention Finland in particular, but we are sure you will find some similarities with your countries, too.

Open the file with [SITRA Mega trend cards](#) to pick up to three MegaTrend cards, which resonate with you the most when you think about impact on youth work.

Each Tension card has a question or 'a call to reflect'. Please share with other youth workers which cards you have chosen and how it might impact young people, youth work and society at large.

Duration: 1.5-2 hours

Outcomes:

- Developing curiosity about political and social developments, including in the digital sphere
